# Letter from the Executive Director

Dear Colleagues,

Since its founding in 2019, the Center for Hydrogen Safety (CHS) has served as a global community committed to advancing the safe use of hydrogen. As a non-profit within the American Institute of Chemical Engineers (AIChE), we bring together industry, government, and academia to strengthen hydrogen safety culture, provide trusted resources, and foster collaboration worldwide.

Building on AIChE's long-standing expertise in process safety, CHS offers training programs, educational content, and technical guidance that help organizations work confidently with hydrogen. A cornerstone of our work is the Hydrogen Safety Panel, whose experts provide independent reviews and practical advice to ensure safety is integrated into projects from the start.

Through international conferences, regional meetings, and a growing catalog of online and in-person training, CHS empowers engineers, regulators, operators, technicians, first responders, and others, with the knowledge and skills they need to support safe hydrogen deployment across diverse applications.

Together, we are shaping a safer hydrogen future.

Sincerely,

Nick Barilo

# Our Vision and Mission

## VISION

A world committed to hydrogen safety.

## MISSION

As the recognized leader in hydrogen safety, CHS provides **guidance, education** and **collaborative forums** to realize the successful and transformative benefits of hydrogen.

**Rich** in Resources
**Strong** in Collaboration
**Focused** on Impact

CENTER FOR Hydrogen® SAFETY
Connecting a Global Community

# Why CHS Membership

### 1 Collaborative Community

Join monthly member meetings, working groups, and the CHS *Engage* platform, where CHS members from around the world share knowledge, ask questions, and connect in real time.

### 2 Answers from Experts

Engage the Hydrogen Safety Panel for services like design and hazard reviews, site evaluations, and incident investigations at a discounted rate.

### 3 Incidents and Lessons Learned

Exclusive access to incident reports and lessons learned, discussed openly on *Engage* or presented by the Hydrogen Safety Panel. Find answers to your questions.

### 4 Training and Resources

Free access to CHS's extensive webinar library and discounts on training courses, credentials, conferences, and archived conference proceedings.

### 5 Contribute to Best Practices

Shape the future of hydrogen safety by participating in technical working groups.

### 6 Demonstrate Leadership

Demonstrate your organization's commitment to hydrogen safety by participating in CHS initiatives, contributing to global best practices, and engaging with key stakeholders at high-visibility events.

# Executive Membership

Executive Membership delivers the highest level of access and influence, including governance participation, early intelligence, and premium cost savings, to help organizations lead safely and strategically in the hydrogen economy.

| Benefit | | Executive ($55K/yr) | Non-Member |
|---|---|---|---|
| Managing Board Seat | | | N/A |
| Premier Hydrogen Safety Community | | | N/A |
| Incident Briefings, Rapid Q&A, Forum, Archive | | | N/A |
| Q&A with HSP Members (Round Table) | | | N/A |
| Advanced Information Before Public Release | | | N/A |
| Unique Training (Webinar) Archive Access | | **Free** | Live Only |
| Monthly Member Meetings and Newsletter | | | Select News Only |
| **DISCOUNTS** | **HSP Expert Review Setup Fee** | **No Setup Fee** | $10,000 |
| | **HSP Expert Review Hourly Fee** | **25% Off** | $450/hour base |
| | **Foundations Expert-Led Training^** | **12% Off $2,288/seat** | $2,600/seat |
| | **Credentialing (with 9 eLearning Courses)** | **50% Off Exam** | $2,570/seat^ |
| | **Conferences** | **5 Free Seats $250 Off/seat** | $1,595/seat^ |
| | **CHS-Created eLearning Courses**** | **Unlimited Seats** | $199/seat |

# Government Membership

Government Membership provides direct access to hydrogen safety expertise, early technical insight, and a global peer community, supporting informed decision-making, effective oversight, and safer hydrogen deployment.

| | Benefit | Government ($30k/yr) | Non-Member |
|---|---|---|---|
| | Managing Board Seat | **N/A** | N/A |
| | Premier Hydrogen Safety Community | | N/A |

| **DISCOUNTS** | | |
| **HSP Expert Review Setup Fee** | **No Setup Fee** | $10,000 |
| **HSP Expert Review Hourly Fee** | **15% Off** | $450/hour base |
| **Foundations Expert-Led Training^** | **8% Off $2,392/seat** | $2,600/seat |
| **Credentialing (with 9 eLearning Courses)** | **25% Off Exam** | $2,570/seat^ |
| **Conferences** | **$250 Off/seat** | $1,595/seat^ |
| **CHS-Created eLearning Courses**** | **50%** | $199/seat |

# Innovator Membership

Innovator Membership supports universities, national laboratories, and startups by providing affordable access to CHS's global hydrogen safety community, early technical insights, and practical learning opportunities. Universities qualify for reduced Innovator pricing of $3k/year.

| | Benefit | Innovator ($6K/yr) | Non-Member |
|---|---|---|---|
| | Managing Board Seat | **N/A** | N/A |
| | Premier Hydrogen Safety Community | | N/A |
| | Incident Briefings, Rapid Q&A, Forum, Archive | | N/A |

| **CHS-Created eLearning Courses**** | **4 Free Courses^^** | $199/seat |

*Varies by offering; seat minimums apply; $200 discount on additional credential exam. ** CHS produced courses through AIChE Academy; SCORM cloud fees extra. ^^ELA201, ELA202, ELA205, and ELA212.*

# Strategic Partnerships

## Advancing Hydrogen Safety Together

CHS partners with leading organizations across research, government, academia, and standards development to strengthen hydrogen safety worldwide. As a neutral convening hub, CHS aligns expertise, shares knowledge, and advances hydrogen safety through collaboration.

## Strategic partnerships help CHS to:

- Accelerate the sharing of hydrogen safety knowledge
- Align efforts across research, operations, and regulation
- Reduce duplication and close critical safety gaps
- Scale impact through coordinated global collaboration

## Who We Partner With

CHS collaborates across the hydrogen ecosystem, including:

- Codes and standards organizations
- Research institutions and national laboratories
- Industry consortia and trade associations
- Government agencies
- Academic and workforce development programs
- International hydrogen safety initiatives

Hydrogen safety is a shared responsibility. CHS's partnership-driven approach supports innovation while reinforcing a strong, consistent global safety culture. Together, CHS and its partners help ensure hydrogen is deployed safely, responsibly, and with public confidence.

CENTER FOR Hydrogen® SAFETY
Connecting a Global Community

# Hydrogen Safety Panel (HSP)

The Hydrogen Safety Panel is a trusted advisory body of leading hydrogen safety experts, offering unmatched expertise to support the safe deployment of hydrogen technologies. Through independent project reviews, incident investigations, and development of guidance on high-risk issues, the HSP plays a critical role in advancing safety across the industry.

**Design reviews**

**Hazard assessment support**

**Site evaluations**

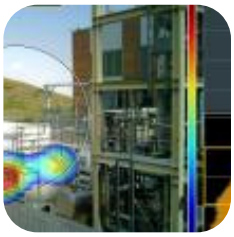

**Incident investigation**

- Over 20 members with more than 800 years of combined experience in the industry
- Safety reviews of safety plans, risk analyses, onsite assessments, and more
- Supports the application of hydrogen codes and standards for unique technologies
- Shares hydrogen safety knowledge through H2Tools.org
- Designated technical support available for CHS Members

# Webinars

Stay ahead of hydrogen safety challenges with expert-led webinars that provide practical guidance on technical and operational issues. Ask questions during live sessions, which are free to all. As a CHS member, access the full searchable library of recorded webinars anytime.

# Conferences and Symposia

Participating in CHS's international conferences gives you direct access to global insights, practical innovations, and proven safety strategies in hydrogen technologies. You'll learn from regional experts shaping the future of hydrogen safety and connect with peers facing similar challenges. Each event includes a dedicated training day to build your skills, plus opportunities to showcase your work, contribute to technical discussions, and grow your professional visibility through abstract submissions and sponsorship.

Each event offers:

- Access to conference proceedings
- Sponsorship opportunities
- Discounted registration for CHS Members

Past and Prospective Locations:

Sydney, Australia

Houston, US

Athens, Greece

Vancouver, Canada

Japan

Peru

Singapore

# Event Sponsorship

Sponsoring our conference underscores your leadership in hydrogen safety and grants you direct access to industry experts. As a sponsor, you'll elevate your brand presence, while exhibiting enables face-to-face engagement to demonstrate how your solutions advance hydrogen safety. Each sponsorship level is customizable to your goals and budget.

1. **Global Audience**: Connect with hydrogen safety experts worldwide
2. **Focused Visibility:** Reach professionals across the value chain
3. **Industry Leadership:** Exhibit your insights and solutions
4. **Direct Networking**: Engage potential customers

CENTER FOR Hydrogen® SAFETY

# Fundamentals of Hydrogen Safety Credential

The CHS Fundamentals of Hydrogen Safety Credential is earned by completing nine foundational eLearning courses and passing an online exam with 80% accuracy. The credential establishes a common, measurable safety competency for employees working with or around hydrogen systems.

## Recognized Quality

All nine courses in the CHS Fundamentals series are approved as preferred educational offerings by the International Code Council (ICC). CHS training and credentials demonstrate a strong foundation in hydrogen safety—helping individuals and organizations lead with safety in a fast-evolving energy landscape.

## Credential Courses Include:

1. Hydrogen as an Energy Carrier
2. Properties and Hazards of Hydrogen
3. Safety Planning for Hydrogen Projects
4. Safety for Hydrogen Facility Design & Construction
5. Hydrogen System Components
6. Liquid Hydrogen Systems
7. Material Compatibility
8. Hydrogen System Operation
9. Maintenance and Inspection
10. Rigorous exam

CENTER FOR Hydrogen® SAFETY
Connecting a Global Community
FUNDAMENTAL
HYDROGEN SAFETY CREDENTIAL

ICC PREFERRED EDUCATION PROVIDER

Completion of these courses demonstrates an individual's understanding of hydrogen properties, design principles, operational procedures, and risk mitigation strategies.

Available through AIChE's learning platform or your LMS.

# Training Program Overview

The Center for Hydrogen Safety (CHS) offers expert-led training that equips professionals with the knowledge needed to work safely and confidently with hydrogen systems.

Our eLearning and instructor-led courses are based on core safety principles that apply across borders, rather than country-specific codes. This global approach ensures learners gain practical, relevant safety knowledge no matter where they work. Designed for employees who interact with hydrogen systems or equipment, CHS courses build understanding of hydrogen's properties and promote best practices for safe handling.

## Flexible Delivery & Organizational Benefits

- Available as on-demand eLearning or instructor-led sessions
- Courses can be hosted on your organization's LMS (additional fee applies)
- Bulk discounts available for most courses (excludes CHS Fundamentals Credential)

## Try it out with a free course ($398 value)

### Hydrogen Laboratory Safety

This course helps the learner understand the hazards of hydrogen and apply best practices for creating and maintaining safe laboratories and safe experiments.

Who Should Attend: All hydrogen laboratory researchers, industry practitioners, principle investigators, administrators, students.

# In-Person Training

## Foundations of Hydrogen Safety Expert-Led Training

3-day in-person training

Hands-on learning with real-world case studies, peer discussions, and the opportunity to earn a Fundamental Hydrogen Safety Credential. Taught by CHS and experts from the Hydrogen Safety Panel, the course builds practical hydrogen safety knowledge based on more than 800 years of combined experience.

## NFPA 2 Hydrogen Technologies Code

4-hour in-person training

Covers code structure, application, and compliance of NFPA 2. Ideal for engineers, designers, and safety professionals operating in jurisdictions that reference NFPA 2.

CENTER FOR Hydrogen® SAFETY
Connecting a Global Community

# First Responders

As hydrogen use expands across transportation and energy sectors, first responders must be prepared to handle hydrogen-related incidents safely. CHS offers focused eLearning courses that equip emergency personnel with the knowledge to respond confidently.

These brief, accessible modules cover hydrogen properties, risks, and response procedures, making them ideal for fire service, EMS, and law enforcement professionals.

## Available Courses

One 1-hour eLearning
Introduction to Hydrogen Safety for First Responders

First Responders Micro Training Learning Plan - Four 25-minute modules:

1. Hydrogen Fuel Cell Vehicles for Incident Response
2. Fire Response & Extrication of Hydrogen
3. Transport of Hydrogen Fuel
4. Hydrogen Fueling Station Incident Response

In-person training for first responders is available.
Contact us at chs@aiche.org for pricing.

# Coming Soon

- New languages offered for the nine Fundamentals of Hydrogen Safety Courses
- Updated course content
- New credentials for Hazard Analysis for Hydrogen Systems, Electrolyzer Safety, Liquid Hydrogen Safety, and Mobility Safety
- Student process safety packet and support of integration of CHS content into university programs, such as the University of Houston Sustainable Energy Development Silver Belt Program.
- And much more...

# 2026 Course Pricing

| Course Code | Title | Format | Duration (hrs) | Non-Member Price (USD) |
|---|---|---|---|---|
| ELA201 | Hydrogen as an Energy Carrier | eLearning | 1 | $199 |
| ELA202 | Properties and Hazards of Hydrogen<br>*Available in English, Español, Français, and* 日本語 | In person or eLearning | 1 | $199 |
| ELA203 | Safety Planning for Hydrogen Projects | In person or eLearning | 1 | $199 |
| ELA204 | Safety Considerations for Hydrogen Facility Design and Construction | In person or eLearning | 1 | $199 |
| ELA205 | Safety Considerations for Hydrogen System Components | In person or eLearning | 1 | $199 |
| ELA206 | Safety Considerations for Liquid Hydrogen Systems | In person or eLearning | 1 | $199 |
| ELA207 | Material Compatibility Design Considerations for Hydrogen Systems | In person or eLearning | 1 | $199 |
| ELA208 | Hydrogen System Operation | In person or eLearning | 1 | $199 |
| ELA209 | Hydrogen System Maintenance and Inspection | In person or eLearning | 1 | $199 |
| ELA210 | Hydrogen Laboratory Safety | eLearning | 2 | $398 value<br>Free with code |
| ELA211 | Water Electrolysis Safety | eLearning | 1.5 | $299 |
| ELA212 | Gaseous Hydrogen Fueling Stations: Safe Design and Operation | eLearning | 1.5 | $299 |
| ELA213 | Vent Design Considerations for Hydrogen Systems | eLearning | 1 | $199 |
| ELA253 | Introduction to Hydrogen Safety for First Responders | eLearning | 1 | Free |
| ELP001 | First Responders Micro Training Learning Plan | eLearning | 1.5 | Free |
| NFPA 2 | NFPA 2 Hydrogen Technologies Code | In person | 4 | Check website for discounts. |

# Fundamentals of Hydrogen Safety Credential Packages

| Membership Type | Exam Fee (USD) | 9-Course Package (USD) |
|---|---|---|
| Executive | $390 | $390 |
| Industry and Government | $584 | $1,480 |
| Innovator | $584 | $2,375 |
| Transit | $584 | $1,082 |
| Non-Member | $779 | $2,570 |

# Fundamentals of Hydrogen Safety Credential

Earned by completing nine foundational courses (ELA201–ELA209) and passing an exam with ≥80% accuracy.

**Hydrogen as an Energy Carrier (ELA201)**
An overview of hydrogen as an energy carrier, including current use, production, delivery, and storage. This course also covers future trends and the importance of safety culture. Who Should Attend: Intended for everyone.

**Properties and Hazards of Hydrogen (ELA202)** *Available in English, Español, Français, and* 日本語
Learn the fundamental properties of hydrogen, how they compare to other fuels, and the specific hazards associated with hydrogen systems.. Who Should Attend: Intended for everyone.

**Safety Planning for Hydrogen Projects (ELA203)**
Covers the importance of organizational safety planning and outlines key components such as hazard analyses, training, and communication. Who Should Attend: Project leaders, facility managers, safety professionals.

**Safety Considerations for Hydrogen Facility Design and Construction (ELA204)**
Guidance on the safe design and construction of hydrogen facilities, including layout, ventilation, electrical systems, leak detection, and emergency response. Who Should Attend: Those involved in the design of facilities with hydrogen systems.

**Safety Considerations for Hydrogen System Components (ELA205)**
Focuses on safe design of system components such as gas storage vessels, compressors, piping, and relief devices. Who Should Attend: Those involved in the design of hydrogen systems.

**Safety Considerations for Liquid Hydrogen Systems (ELA206)**
Covers design considerations specific to liquid hydrogen systems, including material selection, storage tanks, piping, and pressure relief. Who Should Attend: Those involved in the design of liquid hydrogen systems.

**Material Compatibility Design Considerations for Hydrogen Systems (ELA207)**
Explores material selection, with emphasis on hydrogen embrittlement and compatibility of metals and polymers. Who Should Attend: Those responsible for selecting materials of construction for hydrogen systems.

**Hydrogen System Operation (ELA208)**
Covers safe operational practices including following procedures, managing change, and proper system purging. Who Should Attend: Those involved in the operation of hydrogen systems.

**Hydrogen System Maintenance and Inspection (ELA209)**
Best practices for planning, conducting, and documenting inspections and maintenance of hydrogen systems. Who Should Attend: Those involved in hydrogen system maintenance and inspection.

# Additional Training Courses

**Hydrogen Laboratory Safety (ELA210)** - Free course
Introduces hazards and best practices for maintaining safe hydrogen laboratories and experiments. Who Should Attend: Laboratory researchers, industry practitioners, principal investigators, administrators, and students.

**Water Electrolysis Safety (ELA211)**
Equips learners with safety strategies for designing, installing, and operating water electrolyzer systems. Who Should Attend: Anyone involved in electrolyzer system design, installation, or operation.

**Gaseous Hydrogen Fueling Stations: Safe Design and Operation (ELA212)**
Learn best practices for safe design and management of hydrogen fueling stations and how to mitigate risks. Who Should Attend: Engineers, safety professionals, project managers, technicians, inspectors, and regulators.

**Vent Design Considerations for Hydrogen Systems (ELA213)**
Equips participants with the knowledge needed to design safe and effective venting systems for hydrogen applications. The curriculum covers critical topics such as vent system design, equipment selection, siting considerations, and safe discharge practices, with a focus on identifying risks and hazards.

**Hydrogen Safety for First Responders (ELA253)**
Free introductory course for fire, EMS, and emergency responders covering hydrogen basics, hazards, and appropriate response actions.

**Micro Training Plan for First Responders (ELAP001)**
Includes four micro-learnings covering hydrogen vehicles, extrication, transport, and fueling station emergencies.

**NFPA 2 – Hydrogen Technologies Code**
Instructor-led course providing an overview of NFPA 2, its structure, scope, and how it applies to hydrogen facility design and compliance.

# Additional Learning Resources

**H2Tools.org**
Explore the Hydrogen Tools Portal (H2Tools.org) for calculators, best practices, case studies, and incident databases. This free online resource is maintained in collaboration with the U.S. Department of Energy and is regularly updated.
